MATERIALS SCIENCE AND ENGINEERING A VOLUME 167, NUMBERS 1–2, AUGUST 15, 1993

Contents

Microstructural characteristics of plasma spray consolidated amorphous powders 1
S. Sampath (Stony Brook, NY, USA)

Creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy 11
S. C. Khatri, A. Lawley, M. J. Koczak and K. G. Grassett (Philadelphia, PA, USA)

Low cycle fatigue damage in nickel-base superalloy single crystals at elevated temperature 23
E. Fleury and L. Rémy (Evry, France)

The influence of subgrain boundary migration on modeling of the response to stress change in creep 31
F. Dobeš (Brno, Czech Republic)

Effect of ramp-treatment on the cyclic stress–strain curve of "small grained" copper 37
L. Llanes (Philadelphia, PA, USA), A. D. Rollett (Los Alamos, NM, USA) and C. Laird (Philadelphia, PA, USA)

Dipole dislocation structures in ionic crystals 47
A. V. Gektin and V. Ya. Serebryannyi (Kharkov, Ukraine)

Intrinsic thermal–mechanical behaviour associated with the stress-induced martensitic transformation in NiTi 51
P. G. McCormick, Y. Liu (Nedlands, Australia) and S. Miyazaki (Ibaraki, Japan)

Cracking and stress redistribution in ceramic layered composites 57
K. S. Chan (San Antonio, TX, USA), M. Y. He (Santa Barbara, CA, USA) and J. W. Hutchinson (Cambridge, MA, USA)

Creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel 65
R. W. Evans, J. A. Preston, B. Wilshire (Swansea, UK) and E. A. Little (Harwell, UK)

A new method for activation volume measurements: application to $Ni_3(Al, Hf)$ 73
P. Spätig, J. Bonneville and J.-L. Martin (Lausanne, Switzerland)

Nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys 81
S. Lin and H. Ledbetter (Boulder, CO, USA)

Spacing selection for a Sn–Pb lamellar eutectic during directional solidification 87
J. M. Liu (Gottingen, Germany), Z. G. Liu and Z. C. Wu (Nanjing, China)

Thermal residual stresses in particle-reinforced viscoplastic metal matrix composites 97
M. Suéry, C. Teodosiu and L. F. Menezes (St. Martin d'Hères, France)

Evaluation of fatigue-crack initiation at inclusions in fully pearlitic steels 107
C. D. Liu, M. N. Bassim and S. St. Lawrence (Winnipeg, Man., Canada)

Analysis of residual stresses induced by laser processing 115
M. de Freitas, M. S. Pereira (Lisbon, Portugal), H. Michaud (Firminy, France) and D. Pantelis (Chatenay-Malabry, France)

Diffusion along nonequilibrium grain boundaries in a nickel-base superalloy 123
I. M. Razumovskii, L. G. Kornelyuk (Moscow, Russian Federation), R. Z. Valiev and V. I. Sergeev (Ufa, Russian Federation)

Interfaces in alumina-fibre-reinforced aluminium piston alloys 129
H. J. Dudek, A. Kleine, R. Borath (Köln, Germany) and G. Neite (Frankfurt, Germany)

An analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites 139
S. H. Wang, D. K. Matlock and D. L. Olson (Golden, CO, USA)

Solid state solubility of aluminum in the δ-Ni_2Si nickel silicide 147
F. Bosselet, J. C. Viala (Villeurbanne, France), C. Colin (Les Mureaux, France), B. F. Mentzen and J. Bouix (Villeurbanne, France)

CONTENTS *(continued)*

Mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy 155
A. Raveh (Beer-Sheva, Israel)

Energy and structural simulations of the interaction between the grain boundary and dislocations in Ni_3Al alloys. 165
D. Chen, M. Lu, D. Lin and T. L. Chen (Shanghai, China)

A study on the development of mullite fibers using the sol–gel process 171
G. D. Kim, D. A. Lee, H. I. Lee and S. J. Yoon (Seoul, South Korea)

Cracking and delamination of metal organic vapour deposited alumina and silica films 179
V. A. C. Haanappel, H. D. van Corbach, T. Fransen and P. J. Gellings (Enschede, Netherlands)

R.f. magnetron sputtered iridium coatings on carbon structural materials 187
K. Mumtaz, J. Echigoya, T. Hirai and Y. Shindo (Sendai, Japan)

BOOK REVIEWS 197

LETTER
High resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys. L1
S. Wang, C. Li and M. Yan (Shengyang, China)
